1. About Me

My name is Subitha K. I am a passionate developer who loves building mobile apps, web interfaces, and small AI tools. I enjoy learning new technologies, solving problems, and creating clean, user-friendly applications. I build projects using Flutter, JavaScript, Python, Firebase, and Supabase.

I focus on continuous learning and improving my skills through real-world mini projects.

---

2. Skills

- Flutter – Mobile app development
- Firebase – Authentication, Realtime Database, Firestore
- Supabase – Backend service for app development
- Python – Building simple apps, automation, basic AI
- HTML, CSS, JavaScript – Web development
- Problem Solving – Projects and academic assignments
- UI Development – Clean and simple interfaces

---

3. Educational Qualification

- B.Sc Computer Science – Completed at Sri Ramakrishna College for Women
- M.Sc Computer Science – Currently pursuing
- Completed higher secondary with strong academic performance and interest in technology.

---

4. Projects

1. Cart Blanche App (Flutter + Supabase + Firebase)

- A dual application system used for managing items and automating bill generation.

- Uses Supabase for backend operations and Firebase for authentication.
- Built with Flutter, focusing on clean UI and smooth user experience.

2. Tic Tac Toe Game (Flutter)

- Classic game built using Flutter.
- Includes multiplayer mode and simple UI animations.

3. Question Generating AI (Python)

- A Python-based system that generates questions from input text using NLP logic.
- Built for educational use and academic projects.

4. Portfolio Website

- Responsive personal website built using HTML, CSS, JavaScript.
- Showcases skills, projects, education, and contact form.

---

5. Services I Provide

- Making small mobile apps in Flutter
- Helping with Python programs
- Creating simple websites
- Explaining programming topics
- Helping with college mini projects
- Basic AI / chatbot creation guidance

---

6. Frequently Asked Questions

Q: Who is Subitha?
A: A developer with skills in Flutter, Python, Firebase, Supabase, and web development.

Q: What projects have you built?
A: Cart Blanche app, Tic Tac Toe game, Question Generating AI, portfolio website.

Q: What technologies do you know?
A: Flutter, Firebase, Supabase, Python, HTML, CSS, JavaScript.

Q: Can you help with programming doubts?
A: Yes! I can explain coding concepts and guide with small projects.

Q: What is your primary development focus?
A: Mobile app development with Flutter and backend integration.

---

7. Contact Information

You can reach me through the contact form on my portfolio website
or via the email and phone number provided there.

8. Professional Summary

I am a dedicated technology enthusiast with a strong interest in mobile app development, UI/UX design, and intelligent software systems. I enjoy transforming ideas into functional digital experiences. My work focuses on simplicity, clean structure, and user-friendly design.

I believe in learning by building, and most of my knowledge comes from hands-on projects, experiments, and continuous practice.

---

9. Technical Capabilities

Mobile Development

- Building dynamic and responsive apps
- Working with state management
- Connecting apps to cloud databases
- Creating structured navigation flows

Backend & Cloud Tools

- Setting up user authentication
- Managing cloud-based storage
- Handling real-time updates in apps

- Working with API integration

Programming Strengths

- Writing efficient, readable code
- Breaking complex logic into simple functions
- Debugging and problem-solving
- Implementing basic algorithms

---

10. Personal Strengths

- Highly patient and focused while solving problems
- Loves experimenting with new tools and frameworks
- Strong attention to detail in UI layouts
- Enjoys helping others understand technology
- Good at organizing project structure and planning
- Ability to learn new skills quickly

---

11. Additional Interests

- Building small digital tools that simplify everyday tasks
- Creating visual interfaces and layouts
- Working on automation scripts
- Reading about modern software technologies
- Exploring open-source projects and documentation

---

12. Career Goals

I aim to:

- Become a skilled full-stack mobile app developer
- Build more advanced real-time applications

- Create impactful tools that solve real-world problems
- Improve my understanding of databases and server systems
- Explore opportunities in app development and AI-assisted systems

---

13. User Questions the Chatbot Should Answer

Here are topics the chatbot can respond to based on this content:

- My strengths and abilities
- What type of apps or tools I can build
- My interests in technology and development
- What motivates my learning
- My future goals
- My working style and approach to projects
- How I solve problems
- The kind of projects I want to work on

---

14. How I Approach Projects

My workflow usually involves these steps:

1. **Understanding the requirement clearly**
2. **Breaking the task into smaller milestones**
3. **Designing the structure and UI**
4. **Writing modular and reusable code**
5. **Testing features step-by-step**
6. **Improving UI and performance**
7. **Final deployment and documentation**

This structure helps me stay consistent and deliver good results.

---

15. General Answers for the Chatbot

Here are common answers your chatbot should give:

- “I specialize in creating clean and simple applications with modern UI.”
- “I enjoy solving problems and turning ideas into real software.”
- “My goal is to improve every day by learning new technologies.”
- “I focus on writing code that is structured and easy to understand.”
- “I can explain concepts, guide projects, and help with technical questions.”
